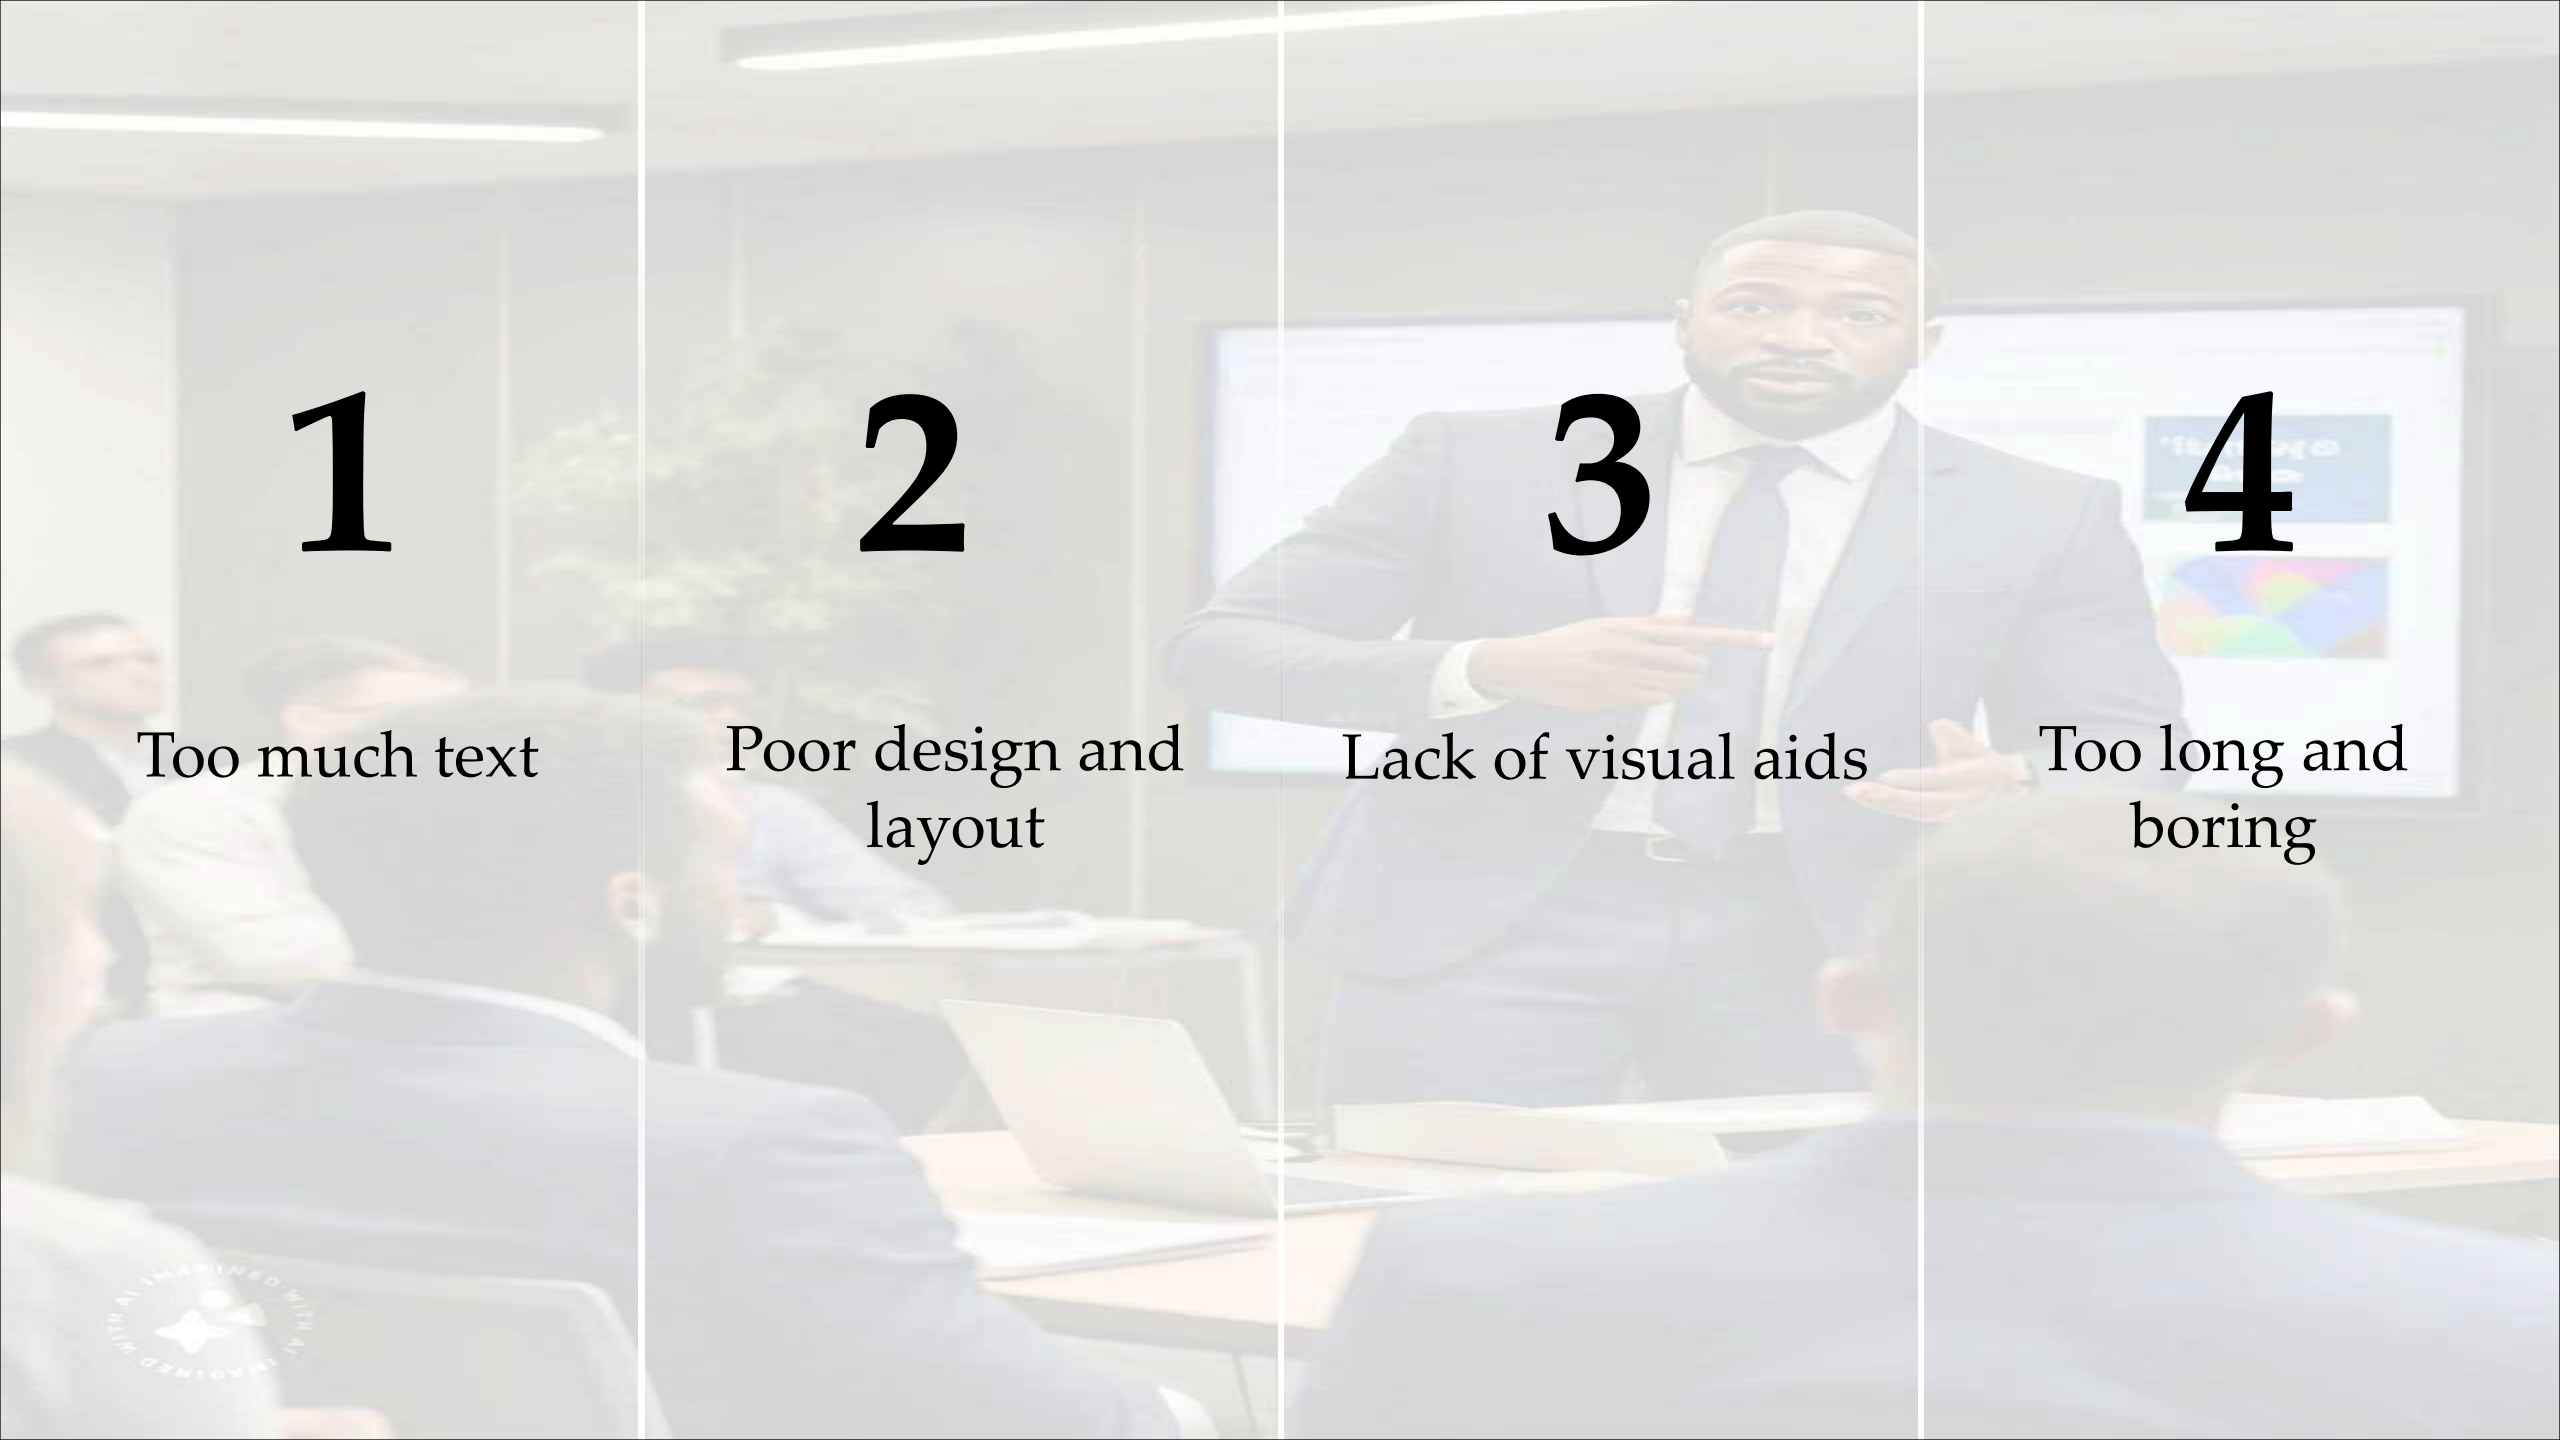
Overview

- In this presentation, we will explore the art of creating dynamic PowerPoint presentations that will engage your audience and leave a lasting impression.
- We will discuss how to avoid common pitfalls, such as using too much text, and how to incorporate elements such as images, videos, and infographics to create a more visually appealing presentation.
- By the end of this presentation, you will be well on your way to creating presentations that are both informative and entertaining

Common PowerPoint Mistakes



1

Too much text

2

Poor design and layout

3

Lack of visual aids

4

Too long and boring

Common mistakes in presentations

- In presentations you should not avoid eye contact with your audience
- You should never speak incoherently and you should not speak too fast. Avoid this by taking short pauses to collect yourself.
- You should not use too many colors in your presentation because it doesn't look serious
- Avoid too many text on your presentation and never write entire sentences
- You should not use images as a background because the text will be difficult to read then
- You should speak free instead of reading aloud
- You should not read the text from the slides because your audience can read for themselves

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum
